2nd HELLENIC CONFERENCE ON ARTIFICIAL INTELLIGENCE (SETN-2002)

11-12 APRIL 2002

THESSALONIKI, GREECE

E-mail: setn02@csd.auth.gr

Scope and Objectives

In recent times the fruits of research in the area of Artificial Intelligence have found their way into various real-life applications, increasing thus the interest and activity in the field. The advent and rapid growth of the Internet and the World Wide Web have intensified this effect, through the increasing demand for intelligent information systems. The contribution of Greek researchers to this process has been substantial, both in Greece and abroad. As a result, it seems to be the appropriate time for an event that will bring these researchers together in a common forum to exchange ideas and strengthen their collaborations. For this reason, the Hellenic Artificial Intelligence Society (EETN), in cooperation with the Department of Informatics of the Aristotle University of Thessaloniki, is organising the 2nd Hellenic Conference on Artificial Intelligence (SETN-2002) in Thessaloniki, April 11-12, 2002.

The conference program will consist of:

- Plenary and poster sessions, where research and application papers will be presented.
- A student session, where graduate students will be able to present their work in progress and receive feedback.
- Demonstrations of commercial products and research prototypes.

Topics

Authors are invited to submit papers in any area of Artificial Intelligence including but not limited to:

- Knowledge Representation
- Reasoning and Search
- Planning and Scheduling
- Speech and Language Processing
- Machine Learning and Knowledge Discovery
- Neural Networks
- Logic Programming
- Computer Vision and Robotics
- Human Computer Interaction
- Multi-agent systems
- Applications of Intelligent Systems

Organisation details

Language: Greek will be the official language of the conference. However, papers have to be written in English, aiming at a greater dissemination.
Proceedings: EETN is in negotiation with an international publisher, in order to publish the proceedings of the conference.

Registration: At least one author of each paper has to perform an early registration in the conference. Details on the registration procedure and deadlines will be announced in due time.

Paper Submission

Papers should have a cover page containing the title, names and full addresses (including e-mail addresses and fax numbers) of all authors, keywords, and a 100-200 word abstract, both in English and Greek. Papers should be written in English, in 12pt Times Roman font, single column and single spacing and must not exceed 10 pages, excluding the cover page. Submissions have to be electronic, in PostScript or PDF format, and papers should be sent by e-mail to the conference address account (setn02@csd.auth.gr). Authors have to separately submit the first page until the 1st of October and the whole paper (including the first page) until the 15th of October.

Notification of acceptance or rejection will be mailed to the first or designated author on or before December 21, 2001. Accepted papers must be presented at the conference, in Greek, by one of the authors.

Important Dates

Deadline for submission of paper abstracts:	1 October 2001
Deadline for submission of full papers:	15 October 2001
Notification on paper acceptance:	21 December 2001
Deadline for camera-ready version of papers:	21 January 2002
Conference:	11-12 April 2002

Thessaloniki

Modern Thessaloniki is a metropolis of over a million inhabitants. Its pleasant situation on the Thermaikos Gulf and its mountain backdrop offer its visitors a variety of options. Rich in history and culture, the picturesque old town, a vast seafront, modern shaded avenues and squares, smart shops and lively nightlife allure the most discerning visitor. A thriving industrial and commercial centre, with two universities and the International Trade Fair is the second largest city and port in Greece. Thessaloniki is located in northern Greece, in the province of Macedonia, 500 Kms north of Athens. Within easy reach of several significant archaeological sites, such as Pella, Vergina and Dion, and of course a short drive away from the idyllic beaches of Halkidiki.
